## Plan Overview

*A Data Management Plan created using DMPonline*

**Title:** collecting and analyzing longitudinal public opinion data

**Creator:** Eiman Abdulla

**Principal Investigator:** Eiman Abdulla

**Data Manager:** Eiman Abdulla

**Affiliation:** Other

**Template:** DCC Template

### **Project abstract:**

It is a large project for Social, Behavioral, and Economic Sciences Directorate of the National Science Foundation (NSF-SBE), part of this project is collecting and analyzing longitudinal public opinion data. The project plans to collect interview response from approx. 1000 adults from all regions of the U.S.

**ID:** 56093

**Last modified:** 27-03-2021

# collecting and analyzing longitudinal public opinion data

---

## Data Collection

### What data will you collect or create?

U. S. based public opinion data should be collected via telephone survey.

### How will the data be collected or created?

The data will be collected via telephone survey to measure trends in attitudes of the American public.

## Documentation and Metadata

### What documentation and metadata will accompany the data?

The Interview data will be collected using computer-assisted telephone interviewing (CATI) software. In addition, the required information and metadata are:

1. Personal information of interviewees.
2. Recording all answered questions by interviewees.

The responses will be stored in a centralized database on a secure server hosted in the PI's department. the metadata will enhanced with descriptive DDL metadata.

## Ethics and Legal Compliance

### How will you manage any ethical issues?

rules and regulations that will govern the protection of human subjects.  
including securing datasets that contains personally identifiable information in order to protect against confidentiality breaches.

### How will you manage copyright and Intellectual Property Rights (IPR) issues?

the security measures will take place to file encryption, password protection, and access restriction.

## Storage and Backup

### How will the data be stored and backed up during the research?

The Interview data will be collected using computer-assisted telephone interviewing (CATI) software. The data will be stored in centralized database and it backs up content daily.

### How will you manage access and security?

The security measures will take place to file encryption, password protection, and access restriction.

## **Selection and Preservation**

### **Which data are of long-term value and should be retained, shared, and/or preserved?**

The public-use version of the data that has been fully de-identified to be transferred to the American Public Opinion Archives.

### **What is the long-term preservation plan for the dataset?**

Producing a public-use version of the data that has been fully de-identified to be transferred to the American Public Opinion Archives, where the data will be preserved, enhanced with descriptive DDI metadata, and made available online.

## **Data Sharing**

### **How will you share the data?**

public-use version will be published online.

### **Are any restrictions on data sharing required?**

the public-use version of the data will be made available after an embargo period of 1 year to allow the PI first use rights of the data.

## **Responsibilities and Resources**

### **Who will be responsible for data management?**

Principal Investigator (PI) will responsible for data management.

### **What resources will you require to deliver your plan?**

PI will include data management costs in the project budget.
